## GREEN CHARTER for Meetings & Events

At Moor Hall Hotel & Spa we have made a commitment to reduce our impact on the environment wherever we can and we have been awarded gold status by the Green Tourism Business Scheme in recognition of our sustainable practices.

This charter outlines a number of steps that we have taken in our meetings and events rooms and around the hotel to help us work towards a sustainable future.

- We correspond with our clients via email rather than printing and posting documents
- We use locally produced ingredients (so reducing food miles) and fairtrade products in our restaurants
- For a small supplement we are able to offer organic meals (must be booked 7 days in advance and minimum numbers apply)
- We use 100% recycled paper within our meeting and event rooms and we recycle all used paper, plastic and cardboard
- We use LED bulbs in our meeting and event rooms and all rooms benefit from natural light which reduces our electricity consumption
- We supply filtered tap water rather than bottled water
- We offer free electric car charging for our guests
- We run one electric car
- Our data projectors are set to eco-mode which uses 20% less energy
- Air conditioning and lighting are individually controlled in event rooms
- There is information on public transport on our website
- Suggested walking routes are available from our Leisure Club
- We actively encourage wildlife in our woods with bird boxes - the woodland walk is a great way to clear your mind during break times!
